

DEPARTMENT OF CHEMISTRY

PROGRAMME OUTCOMES

- To understand basic facts and concepts in chemistry.
- To apply the principles of chemistry.
- To appreciate the achievements in chemistry and to know the role of chemistry in nature and in society.
- To familiarize with the emerging areas of chemistry and their applications in various spheres of chemical sciences and to apprise the students of its relevance in future studies.
- To develop skills in the proper handling of instruments and chemicals. And their application.
- To familiarize with the different processes used in industries
- To develop an eco-friendly attitude by creating a sense of environmental awareness. To be conversant with the applications of Chemistry in day-to-day life.
